

REMARKS

By this Office Action, the Examiner has required an election of one of the following species of the claimed invention under 35 U.S.C. §121:

Species A: Claims 3, 5, 14, 15, 23, and 24, directed to the three dimensional structure of the tyrosine kinase domain of the IGF1 receptor described by the coordinates of Appendix A, and

Species B: Claims 7, 17, and 26, directed to the three dimensional structure of the tyrosine kinase domain of the IGF1 receptor selected from the group consisting of an ATP-binding pocket, a peptide substrate binding groove, a hinge region on the backside of the kinase domain, and an alpha helix C.

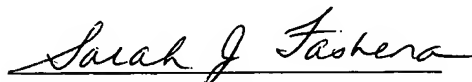

Responsive to the Requirement for Restriction, Applicants elect to prosecute the invention of Species A, Claims 3, 5, 14, 15, 23, and 24, directed to the three dimensional structure of the tyrosine kinase domain of the IGF1 receptor described by the coordinates of Appendix A.

Moreover, it is Applicants' understanding that claims 1, 2, 4, 6, 8-13, 16, 19-22 and 27-32 are viewed as generic and remain under consideration.

No additional fees are believed to be necessitated by the foregoing Response. However, should this be erroneous, authorization is hereby given to charge Deposit Account No. 11-1153 for any underpayment, or credit any overages.

In view of the above, an early action on the merits of the Claims is courteously solicited.

Respectfully submitted,

Sarah J. Fashera, Ph.D.  
Agent for Applicant(s)
